## CONTINUING EDUCATION SPONSORSHIP REQUEST INSTRUCTIONS

The purpose of continuing education is to ensure license and certificate holders keep their knowledge current in the area of laws and regulations; provide proper, safe and efficient pesticide use; protect the public health, environment and property; and encourage safe working conditions for agricultural and pest control workers. Examples of continuing education instruction may include: College level instruction, demonstrations or presentations of current applied research; professional or technical seminars; demonstrations relating to pesticides or pest management; and field trial tours. *Note: Sales presentations or exams/testing will not be approved.* Instruction for "continuing education" in pesticides and pest management must be preapproved by the Department of Pesticide Regulation (DPR). To obtain approval, sponsors must submit a Continuing Education Sponsorship Request (form PR-ENF-131) to DPR, Pesticide Enforcement Branch, Licensing and Certification Program, 830 K Street, Sacramento, CA 95814-3510. Copies of this form are available on DPR's web site at <http://www.cdpr.ca.gov>, at all county agricultural commissioner offices, or you may call the Licensing and Certification Program at (916) 445-4038, and a form will be mailed to you.

The completed Continuing Education Sponsorship Request, with two copies of the course outline and course description, must be received by DPR at least 30 days before the course is scheduled to begin. You will be notified within 20 days if your application is determined to be incomplete. The maximum time for DPR to approve or deny course accreditation is 30 days.

**Section A: Course Description.** This information is used for record keeping and contact purposes. We will send approval status information to the person at the address listed on the application.

**Section B: Course Availability.** This information may be provided to persons who inquire about continuing education opportunities.

**Section C: Hours Requested for Each Topic.** Indicate the number of hours you are requesting for each category. **Minimum instruction must be one hour in length.** One 15-minute break may be included during each four-hour instruction presentation.

**Section D: Hours Approved for Each Topic.** This section will be completed by DPR staff. Approval is based upon the information you submit.

**Section E: Who is the Targeted Audience?** Who are you targeting?

**Section F: Course Outline.** Sign and date the application. Include two copies of the course outline and a description of the course and number of hours you are recommending for each topic. Mark both copies of the outline with appropriate L, A, or O to indicate the category which best describes the course and note the number of hours you are requesting for each L, A, or O. For example, you would mark "New Laws Affecting Pest Control Businesses" with a "L" for 'Pesticide Laws and Regulations' and a "2" if the course is two hours in length. Training course categories are:

Pesticide Laws and Regulations 'L': Examples: California and federal laws and regulations impacting pest control and the use of pesticides. Courses pertaining to the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), California Food and Agricultural Code and accompanying regulations, or other pesticide regulatory codes; pesticide and field worker safety; pesticide storage, transportation, and disposal; endangered species; ground water protection; pesticide labeling; licensing and certification requirements for pesticide applicators and advisers; and pesticide registration.

Aerial Equipment and Application Techniques 'A': Examples: Characteristics, advantages, disadvantages, selection, use, cleanup, and care of aerial application equipment and application techniques; drift reduction; calibration of liquid and dry systems; dispersal equipment; swath marking and flight patterns.

Other Pesticides or Pest Management Topics 'O': Topics about pest management and pesticides other than the two course categories listed above. Examples: Pest identification, crop ecosystems, pest life histories, economic thresholds, cultural practices, biological control, plant and animal management systems, chemical control and other components of pest management systems. Other examples include characteristics, advantages, selection, use, cleanup, and care of ground equipment; use of compressed air, back-pack, low-pressure, high-pressure hydraulic, and air-blast sprayers; ultra-low volume, injection pump, dust and granular applications; application and drift reduction techniques; and equipment calibration.

**Section G: Notification Status.** This section will be completed by DPR staff, then returned to you. This section will tell you if we need additional information to process your application or inform you about DPR's approval or denial of the course/seminar for continuing education accreditation.

- Reminders**
- o Submit the application at least 30 days before the scheduled course/seminar.
  - o Mark the course or course outline with a L, A, or O and the number of hours you are requesting.
  - o The outline and two copies must include time break-outs, course title, description and speaker's name.
  - o At least one hour of course material must be presented.

If you need assistance completing this form, please call the Licensing and Certification Program at (916) 445-4038.

**If you FAX the application, please DO NOT mail the hard copy to DPR.**
